

Contact Management

Contact Management

The contact management system provided with EasyWorld Software provides for full management of all contact events by your company staff. All contact events to Customers, Vendors, Manufacturers, Prospective Customers, Non-Company Locations, or any other type of contact can be managed by using EasyWorld Software.

Contact events include phone calls, meetings, scheduled events, completed events, canceled events, mailings, sales calls, emails, and can include any type of event to meet your organizations needs.

Fully Customizable

Contact Management is fully customizable to meet any organizations contact management needs. You may add any type of contact events that is applicable to your organization and EasyWorld software can be configured to track and organize any type of contact event.

Fully Integrated

Contact Management is fully integrated into the EasyWorld Software. Reminders, Scheduling, Messaging, Customers, Vendors, Accounts Receivable, Accounts Payable, and the entire suite of applications in EasyWorld Software are available features to users utilizing Contact Management.
