

Easy User Interface

EasyWorld is very easy to use:

EasyWorld Software has a very consistent and easy to use look and feel and the software is very intuitive to use. You can manage complex or simple tasks with such features as scheduling, reminders, system notifications, task lists, messaging, status tracking and software configuration to make your work day more productive and easier.

Easy Main Menus:

All of the Main Menus in EasyWorld are very easy to use. Users can access all of the menu categories in EasyWorld Software from any of the simple to use Main Menu systems. If your company needs are not met by any of the Main Menus available in EasyWorld Software, your company can request additional Main Menu screens to be added for your company.

Easy User Screens:

User screens are consistent with each other in features and use. Support and training is available to users to help make using EasyWorld Software as easy as possible.

EasyWorld is Fast:

All of the user screens and forms that are available to users are easy to use and have fast data access whether you have small or a large amount of data to track and organize in EasyWorld Software.
