

Features Requests

Features Requests:

Your company can request additional functionality to be added to your EasyWorld Software. EasyWorld Software will respond to your request by giving you a date that your requested features will be available in your EasyWorld Software. Features requested can be added to your EasyWorld Software as your software is updated to the current version on a monthly, quarterly, and/or annual basis keeping your company running on the most current version of EasyWorld Software with the added features that you have requested. Software updates can be done automatically by EasyWorld Software over the internet or on site and in person by EasyWorld Software support personnel depending on your company's needs and level of support. Support, training and feedback regarding using your requested features are available.
